

L100W-2HHLF

PRESSURE PUMP

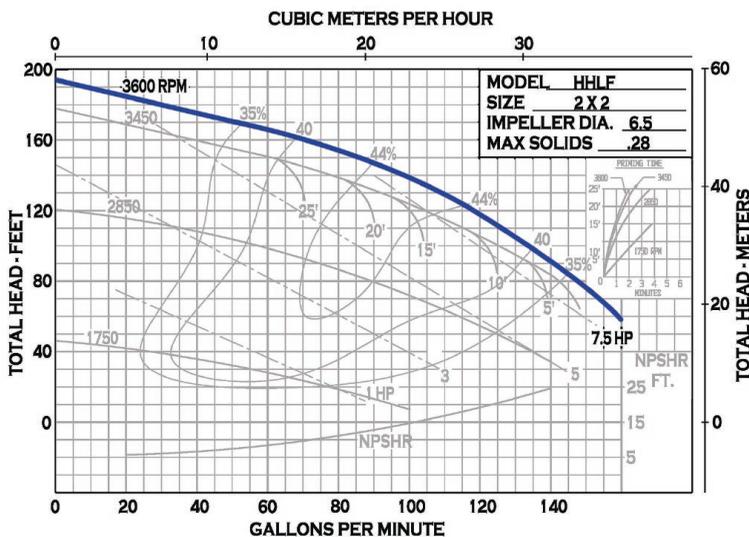

Laborde Power Products are powered by Yanmar diesel engines and feature a wide range of pressure pump applications. Laborde Power Products pumps in this series are mounted on vibration isolators and protected in a stainless steel roll cage. Pressure pumps are primarily used for clear water transfer.

Model L100W-2HHLF is factory tested and conforms to meeting USCG and ABS standards for 46CFR27.301 requirements (80gpm/60psi at pump discharge) as a portable fire pumps.

SPECIFICATIONS
